

## DOWNLOADING INSTRUCTIONS FOR WRITER'S HELPER V1.0.1

These instructions are for those who wish to download the Writer's Helper for the first time or to download an upgrade version.

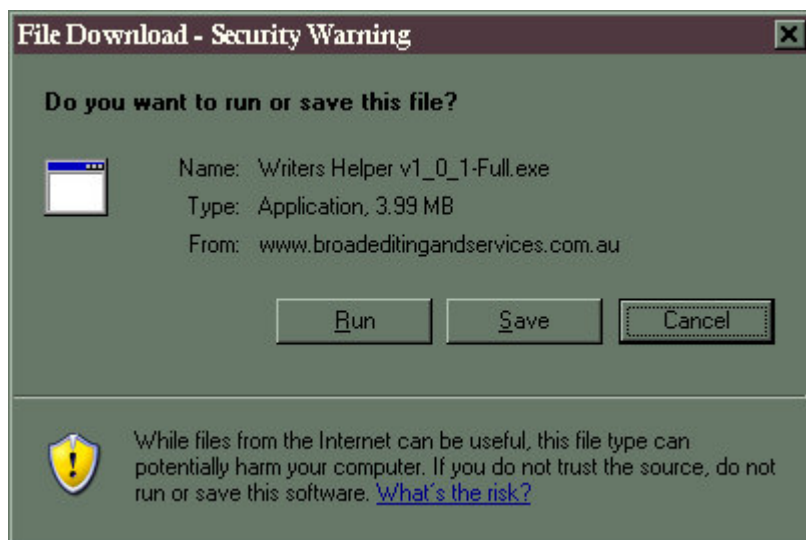

### Important Note for Writer's Helper Upgrade

For those who wish to upgrade an existing full or trial version, we strongly recommend saving a copy of your current Writer's Helper folder (e.g. C:\Program Files\BES) before performing any upgrades.

Downloading the trial version over an established version will override all existing data files; therefore, if you have an old version then select **Upgrade**.

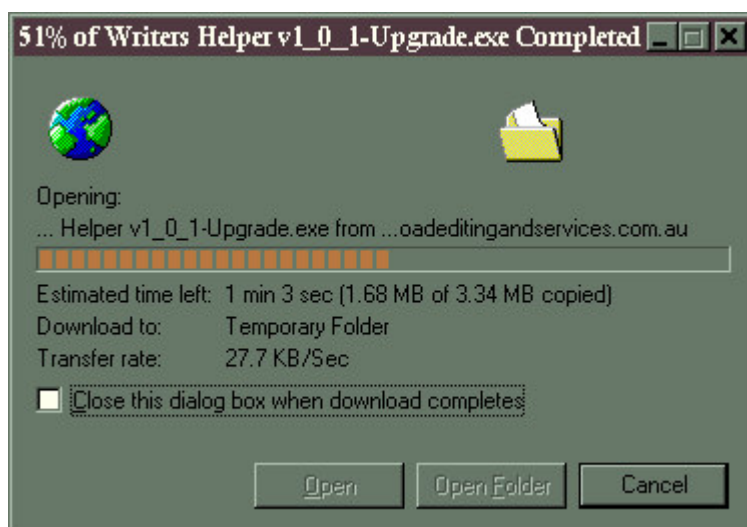

### How to Download Writer's Helper

1. Click on the download link.
2. File Download – Security Warning dialogue box pops up, as shown below:

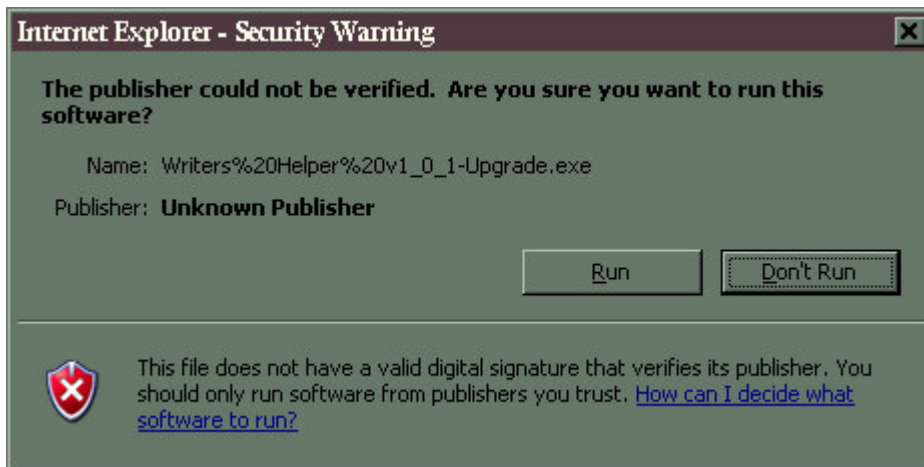

Click the Run button.

3. The following dialogue box will pop up.

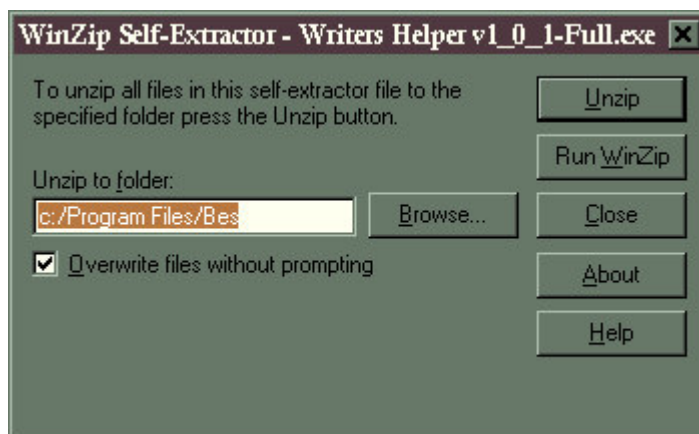

4. Once it has finished, another Security Warning dialogue box like the one shown below may pop up.

Click the Run button.

5. The WinZip Self-Extractor dialogue box will pop up. We recommend allowing it to save the files in the default folder as shown.

Click on the Unzip button. Click on the Close button once it has finished.

6. Double click on **Setup\_WritersHelper.exe** (to run the program) to make changes to the Writer's Helper's data files so they are compatible with the new version.
7. Run Writer's Helper by double clicking on **Writers Helper.exe**.
